

New College Proudly Presents

Come and join us for a free three-hour introductory session in which we will explore the key concepts of **CLOUD COMPUTING and demonstrate some of its most amazing features on **Microsoft Azure**.**

Microsoft has more pre-built models than other public cloud vendors and has more datacenters throughout the world, making it one of the best cloud providers in the world. Cloud services are becoming increasingly popular: 60% of information technology spending in 2016 was Cloud-based and the size of the public Cloud service market will reach \$236B by 2020. As one of the most evolved forms of infrastructure, cloud computing comes with many unique sets of features. This introductory session is intended for students from **ITEC**, **HRM** and **ADMS** departments and will demonstrate key features of the cloud computing.

The following topics will be covered in this introductory session:

- Introduction to Cloud Computing and a complete review of its key features
- Introduction to Public Cloud Services
- Introduction to Microsoft Azure and Microsoft Cloud Services (IaaS, PaaS, SaaS)
- Virtualization and Cloud computing
- Implementing a Server on Microsoft Azure with all associated configurations with step-by-step review of details

TUESDAY MARCH 6, 2018
